EDUCATION

Bapuji Institute of Engineering & Technology

B.E. Computer Science Engineering (Current Semester: 5th)

Davanagere, India

2024 - 2028

SKILLS

Languages: C++, Java, Python

AI & ML: TensorFlow, PyTorch, Scikit-learn, OpenCV, Computer Vision, OCR, Deep Learning, CNN, Transfer Learning, Google Gemini API, LLM Integration, Prompt Engineering, Edge AI

Cloud: AWS, Microsoft Azure, Google Cloud Platform

DevOps: Docker, Kubernetes, Jenkins, Git, GitHub, GitHub Actions, Terraform, Ansible, Nginx

Cybersecurity: Splunk Enterprise (SIEM), Microsoft Sentinel, IBM QRadar, Wazuh, Wireshark, Nmap, Burp Suite, OWASP ZAP, Metasploit Framework, Kali Linux, Nessus Essentials

Databases: MongoDB, PostgreSQL, SQL

EXPERIENCE

Zorix Agency

Co-Founder

March 2026 - Present

Remote

- **Web & SEO:** Developed responsive websites and SEO solutions for businesses.
- **Marketing:** Managed social media campaigns, branding, and client projects.
- **Collaboration:** Collaborated with cross-functional teams to deliver end-to-end digital solutions.

PROJECTS

- **iTantra - Offline Multilingual Emergency Communication (SIH 2026)** (Kotlin, Android, Bluetooth RFCOMM, Wi-Fi Direct, IndicConformer, IndicTrans2, Room, AES-GCM): Developed an offline P2P communication system with multi-hop mesh and store-and-forward routing, integrating on-device multilingual STT, translation and TTS for low-bandwidth voice communication across 10 Indian languages, with encrypted messaging, SOS priority alerts, ACKs and replay protection, and optimized AI inference using VAD, quantization and on-demand model loading for low-resource devices.
- **NullTrace - AI-Powered Cybersecurity Platform** (React.js, Next.js, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Google Gemini AI, OCR): Developed an AI-powered cybersecurity platform to detect phishing attacks, spam, fake jobs, malicious URLs, and online scams, with modules for URL scanning, email analysis, OTP scam protection, screenshot OCR scanning, and an interactive threat dashboard.
- **AI Medical Imaging Diagnosis Platform** (Python, TensorFlow, OpenCV, React.js, Next.js, Node.js, Supabase): Developed an AI-powered medical imaging platform for automated disease diagnosis, training a deep learning model and integrating it into a web application to provide diagnosis with confidence scores.
- **TracxnLabs - AI-Powered Secure Online Examination Platform** (React.js, TypeScript, Vite, Tailwind CSS, Supabase, PostgreSQL): Developed an AI proctoring platform with webcam monitoring, face detection, tab-switching and fullscreen-exit detection, a credibility scoring engine, and an admin dashboard for live monitoring and analytics.

CERTIFICATIONS

- AWS Cloud Practitioner Essentials - AWS Training & Certification
- Ethical Hacker - Cisco Networking Academy
- Google 5-Day AI Agents Intensive Course
- MongoDB Course Completed

ACHIEVEMENTS

- 1st Place - HackArena 1.0
- 3rd Place - HackFest 1.0, Shivamogga National Level Hackathon
- 4th Place - MedhaDrishti AI National-Level Hackathon
- 4th Place - Hack Genesis 2026, IEEE Student Branch, KLE Technological University
- Top 10 - Build Bengaluru Hackathon, Microsoft Office, Bengaluru
- Participant - SIH Internal Hackathon, Bapuji Institute of Engineering & Technology, Davanagere

ADDITIONAL INFORMATION

Soft Skills: Problem Solving, Leadership, Team Collaboration, Communication, Critical Thinking, Time Management, Innovation

Languages Known: English, Kannada, Hindi
